ACTIVITIES & MESSAGE TO MEMBERS

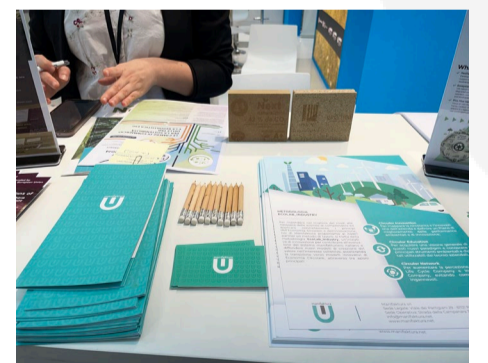

MANIFAKTURA brings together complementary skills built over more than 20 years of experience in the wood and furniture sector. We support companies and projects in product certification, research, training, innovative product development, and technology transfer. With strong expertise in #CircularEconomy and #OpenInnovation, we actively collaborate with clusters, universities, research centres, associations, and companies/SMEs across Europe. Beyond our role as technical partner, we contribute to DEC activities in EU projects, helping maximise visibility, stakeholder engagement and impact. We are open to new collaborations within the InnovaWood network.
